

## DATASHEET

### Duplex Jumper LC-ST 50/125μ, OM4

Fiber jumper are well defined components in international standard of structured cabling ISO/IEC11801. Due to many different network protocols created in the last 25 years, also a wide range of connectors had been developed. Some of them are still important today: LC, SC, E2000®, MPO/MTP.

Fiber jumper(patchcord) are defined as shortest connection between passive interface and active deviceport, regarding structured cabling standard. Rating of performance, known as category, as well as performance of total transmission channel, known as link class, Similar descriptions for patchcords: Connection cable, drop cable, adapter cable, interconnecting cord, Jumper

<b>Fibre type:</b>	Multimode 50/125
<b>Category:</b>	OM4
<b>Number of fibres:</b>	2
<b>Cable type:</b>	Duplex
<b>APC-version:</b>	False
<b>Anti-kink sleeve:</b>	put-on
<b>Cable Ø:</b>	2.0 mm
<b>Colour outer sheath:</b>	erika-violett
<b>Flame retardant:</b>	According to EN 50265-2-1
<b>Halogen free (according to EN 50267-2-3):</b>	True
<b>Type of connector connection 1:</b>	LC-Duplex
<b>Connector colour 1:</b>	beige
<b>Type of connector connection 2:</b>	ST
<b>Operating Temperature:</b>	-20 – 75 °C
