

MTP® COMPONENTS

Maximum performance in the smallest space

Profile of EFB-Elektronik

EFB-Elektronik GmbH is a leading manufacturer and system provider of networking technology and industrial system solutions. Our expertise ranges from structured cabling using certified high-end products for data centres to custom developments for industrial clients.

Our team services customers worldwide from our headquarters in Bielefeld, Germany. Our customer base includes renowned household names from the IT and security industry, as well as medium sized companies and large corporations. Our membership in the international TKH Group based in the Netherlands, with more than 6,500 employees and production facilities around the globe, gives us additional leverage for the benefit of our customers.

The EFB Group is represented throughout Europe with 400 employees at nine locations. In addition to numerous sales locations in Germany, we have subsidiaries in Istanbul, Copenhagen and Vienna as well as a production location in Slovakia.

MTP® Components –

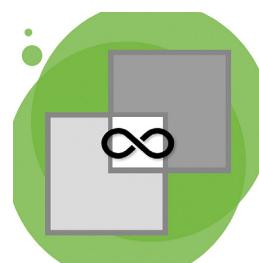

high performance in the smallest possible space

Achieve top performance on your fiber optic link: MTP®/MPO components (Mulitpath Push-On/ Multifiber Termination Push-On) offer outstanding transmission characteristics - and that in the smallest space. Thanks to the SFF (Small Form Factor) design, a packing density is achieved that is not comparable with any other connector on the market. EFB-Elektronik offers a comprehensive portfolio with which it is possible to build the entire MTP® route. Discover excellent quality and choices that fit your requirements.

MTP® CONCEIVED AS A SYSTEM

EFB-Elektronik is your one-stop source for everything from standard patch cables to active technology.

MTP® THOUGHT MODULAR

The applications are almost limitless: you can build modular lines. For example, combinations of our copper cabling programme with MTP® components are possible.

MTP® FAIR THOUGHT

Benefit from fair prices and maximum application flexibility

MTP® THOUGHT FOR YOU

Thanks to high stocking, you will receive your orders in a short time

Perfectly suited for use in the data centre

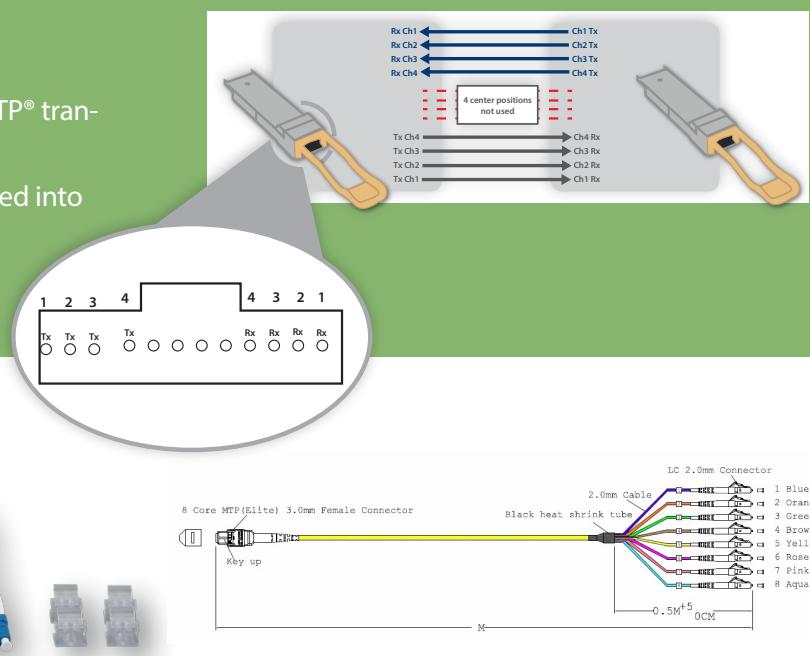

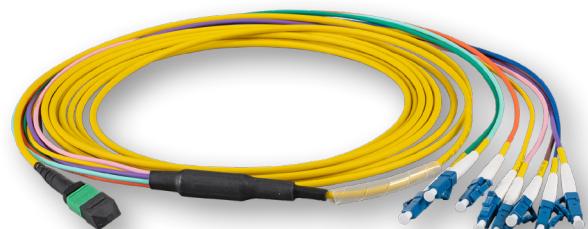

The MTP®/MPO connectors have an MT ferrule that is designed for multi-fiber accommodation: 4 to 144 fibers can be accommodated in just one connector. This feature makes the connectors ideally suited for use in data centres - they are standardised for data centre applications according to ISO 11801 and EN 50173-5.

MTP® Harness-cable 8-fiber

Why 8-fiber?

Due to the design and the parallel optics, the MTP® transceivers have only 8 transmit and receive units.

For example, for a 100G channel, these are divided into 4x25G channels in the transceiver.

MTP®-F/LC 8-fiber patch cable OS2

Application: Suitable for transmission links up to **100 Gigabit**

Construction: 1 multi-connector MTP® on one side,

4 LC-Duplex connector on the other side

LowLoss version: attenuation per Fanout max. 0,35dB

Matrix: 8 fibers

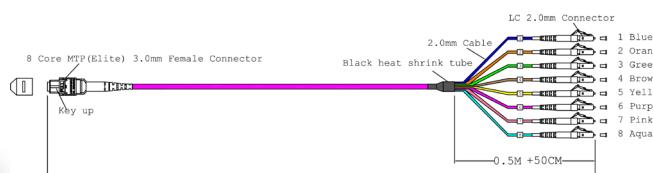

Furcation length: 50cm

Cable diameter multi-connector: 3mm

Cable diameter single-connector: 2mm

Colour: OM4 and OS2 acc. to colour code DIN VDE 0888

MTP® Harness-cable 12-fiber

Why 12-fiber?

12-fiber MTP® cables are used to save space in the distribution of fiber optic lines. This ranges from small server rooms to data centres.

The fiber route is usually converted from LC transceivers to MTP® cables and then back to LC.

Why are LC connectors used?

This is due to the HD (High Density) factor, because of which many data centres are only equipped on an LC basis in order to save space. In addition, the design of the SFP transceivers is only available with LC mating face.

HD Patch panel

Hint:

With the 8-fiber matrix harness cables from EFB-Elektronik, the assignment of the individual channels from the MTP® cable to the LC connectors is already assigned accordingly.

MTP® Patch cable 12-fiber

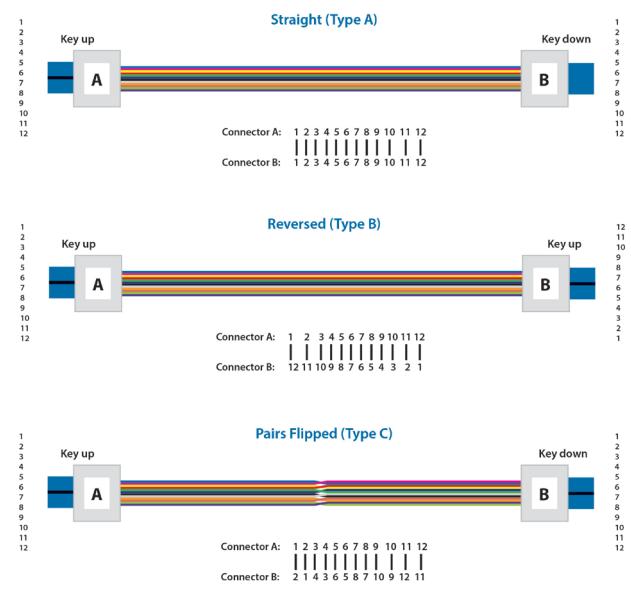

What is the difference between MTP® Type A and MTP® Type B cables?

An MTP® type A cable describes an MTP® 1:1 connection.

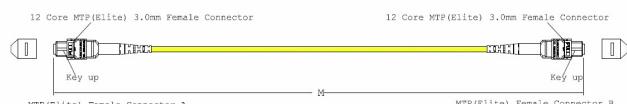

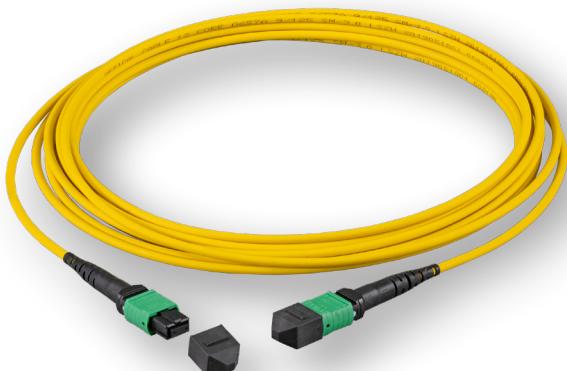

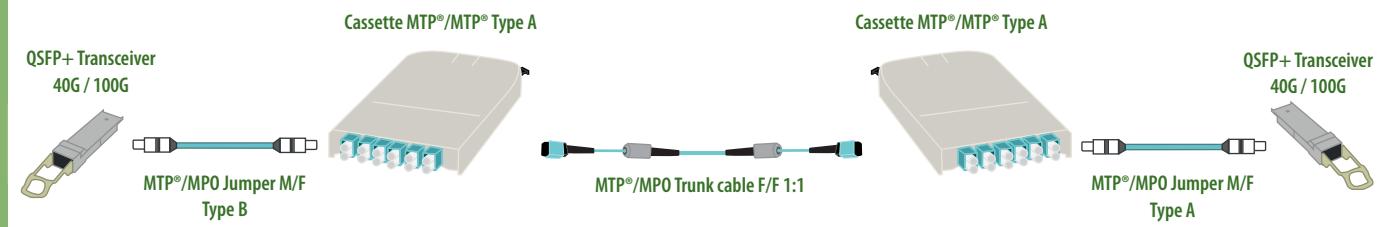

An MTP® Type B cable describes an MTP® connection in which the pairs (e.g. 1 and 2) are swapped to swap the RX (receiver) and TX (transmitter) channels accordingly so that a connection can be made between 2 transceivers without additional patching.

Why is there an MTP® female connector on the confections?

MTP® transceivers or MTP® distribution box are equipped with an MTP® male connector. As a result, the cables are connected with MTP® Female plugs.

40 Gigabit und 100 Gigabit Ethernet transmission link

MTP®-F/MTP®-F 12-fiber matrix Patch cable OS2, Code B

Application: Server to Server- / Switch to Switch connection,

Suitable for transmission links up to **100 Gigabit**

Connector manufacturer: **US Conec**

Matrix: 12 Fibers

Singlemode variant always as APC version

Colour: OM4 erica-violet and OS2 yellow Available lengths: 1m up to 100m

Hint: In each MTP® transmission link, a type B (crossed) patch cable is required

MTP® Fanout cable 8-fiber

Why are there MTP® female and male connectors?

An MTP® connector must consist of a male and a female plug in order to centre the fibers.

MTP® adapters therefore only have the function of a mechanical holder and pin assignment.

Fanout Cable MTP®-Male/LC 8-fiber OS2

Application: Suitable for transmission links up to **100 Gigabit**

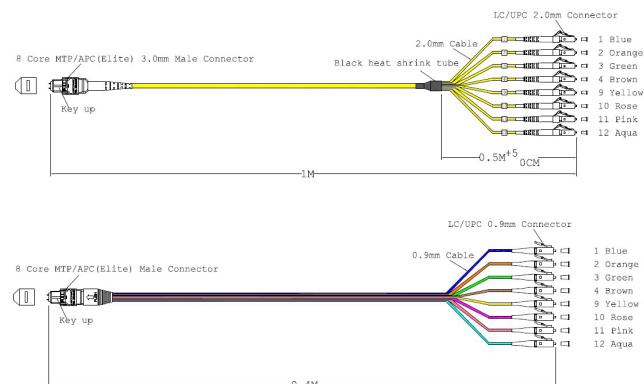

Construction: 1 multi-connector MTP® Male on one side, 8 Single connector on the other side (e.g. LC)

LowLoss version: attenuation per Fanout max. 0,35dB

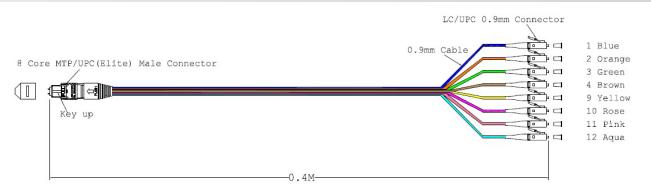

Matrix: 8 fibers

Cable diameter single-connector: 900µm

Colour: OM4, OM3 and OS2 acc. to colour code DIN VDE 0888

MTP® Adapters

MTP® / MPO Adapter, black, flangeless SC Simplex

Type of connector connection 1: MTP®/MPO
 Type of connector connection 2: MTP®/MPO
 Design: .SC-Simplex
 Type of housing: flangeless
 Type of fastening: screw/lock
 Sleeve material: plastic

MTP®/MPO adapter, flangeless in SC Simplex dimension

Article-No.	Description	Suitable for type of fiber	Colour	Type
53458.1	MTP®/MPO adapter flangeless, codable up/up or up/down	Multimode/ Singlemode	black	PC/ APC

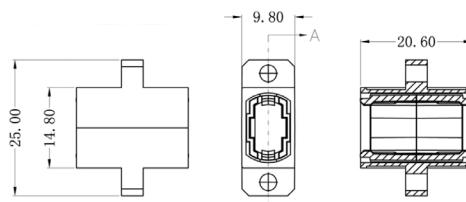

Hint:

The flangeless MTP® adapter 53458.1 can be used for front-side assembly of the FTTH-MODUL-xxxx for the distribution of 12-fiber direct connections. Furthermore, the adapter can be inserted into the Keystone adapter 37501xx.1 and adapted into any Keystone cut-outs (e.g. distribution panel, Keystone frame sets, etc.).

Hinweis:

The MTP® adapter 53458.1V2 can be used for rear mounting of the FTTH-MODUL-xxxx in order to use 12-fiber direct connections to the cassettes.

MTP® cassettes and racks

FTTH Cassette LC for FTTH-BGT

Suitable for 1HE and 3HE subrack FTTH-BGT-xHE

Pre-equipped with 6 LC-Duplex adapter in single mode, multimode OM4 or multimode OM3 with ceramic ferrule

Inclined outlet left/right for the 1HE version, top/bottom outlet for the 3HE version

Cable entry via MTP®/MPO coupling

Splice cassette (Shrink -and Crimp protection) holder included in cassette for MTP®/ MPO free installation

Article-No.	Description	Quantity adapter	Adapter	APC
FTTH-MODUL-LCPC	FTTH Module for FTTH-BGT, 12 Port LC/APC with OS2 ceramic adapter	6	LC duplex	Yes
FTTH-MODUL-LCOS2	FTTH Module for FTTH-BGT, 12 Port LC with OS2 ceramic adapter			No
FTTH-MODUL-LCOM4	FTTH Module for FTTH-BGT, 12 Port LC with OM4 ceramic adapter			No
FTTH-MODUL-LCOM3	FTTH Module for FTTH-BGT, 12 Port LC with OM3 ceramic adapter			No

FTTH Cassette SC for FTTH-BGT

Article-No.	Description	Quantity adapter	Adapter	APC
FTTH-MODUL-SCS2	FTTH Module for FTTH-BGT, 6 Port SC with OS2 ceramic adapter	6	SC	No
FTTH-MODUL-SCOM4	FTTH Module for FTTH-BGT, 6 Port SC with OM4 ceramic adapter			
FTTH-MODUL-SCOM3	FTTH Module for FTTH-BGT, 6 Port SC with OM3 ceramic adapter			

Hint:

The module inserts are equipped with SC or LC adapters, not with fanout cables and MTP® adapters.

The reason: The splice variant can be used for shrink splice protection as well as for crimp splice protection via the integrated holder. When using it as an MTP® variant, the following must be taken into account when equipping it: Adapter 53458.1V2 must be integrated to create the connection. The associated fan-out cable must be selected according to the category.

MTP® Transceiver

QSFP+ 40GBASE-SR4, 4x10.5GBPS MPO

The QSFP+ transceiver are for 40 Gigabit Ethernet connections over 850nm multimode fibers designed. They are according to QSFP+ MSA, IEEE 802.3ba 40GBASE-SR4 and 4 x 10GBASE-SR. Additionally the transceiver features digital diagnostic functions and has optical power monitoring.

Up to max. of 40Gb/s, 10,5Gb/s per channel
4-channel full duplex transceiver module
maximum range: 150 m (OM4), 100 m (OM3), 30 m (Om2)
Hot-pluggable QSFP+ design
Mating face: 1 x 12 MPO female
Max. power consumption 1.2 W
Reliable VCSEL technology
RoHS compliant

MTP® applications

MTP® channel setup:

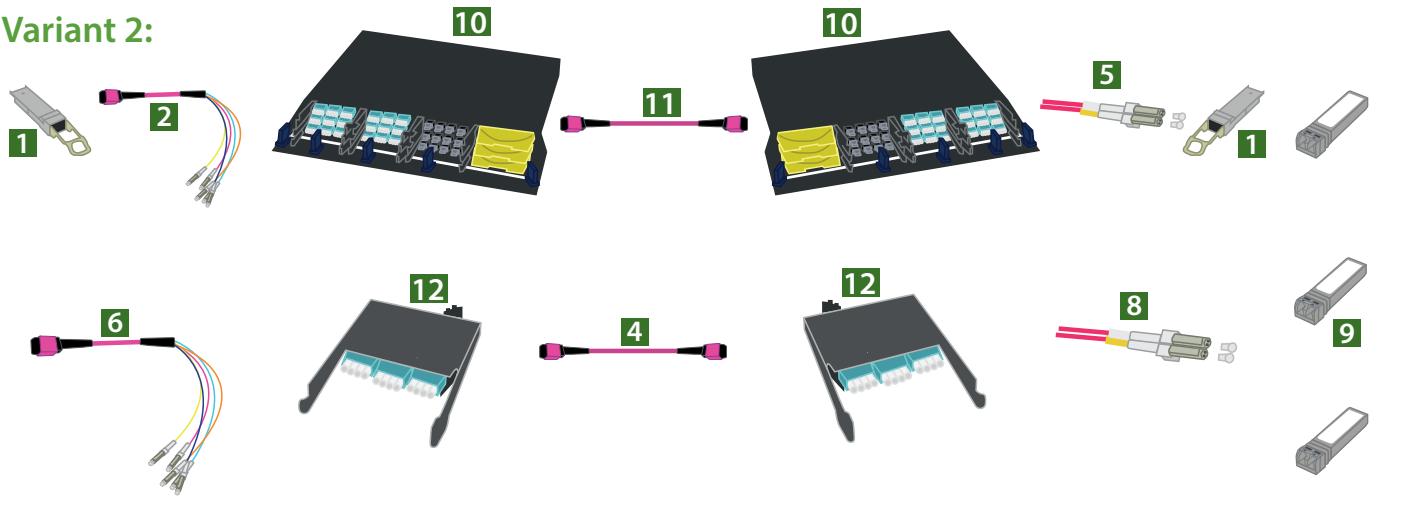

- To build up a transmission link from an MTP® QSFP switch to a floor distribution with LC SFP modules, a migration from e.g. 100G MTP® to 4 x 25G on LC basis is realised.
- For cabling, an MTP® harness cable in 8-fiber is used to keep the cabling effort as low as possible.
- In addition, there is a collection point for MTP® to which an MTP® cable is connected in 12-fiber.
- Another collection point is located at the other end in order to be able to convert from MTP® to LC again.

Direct Connect

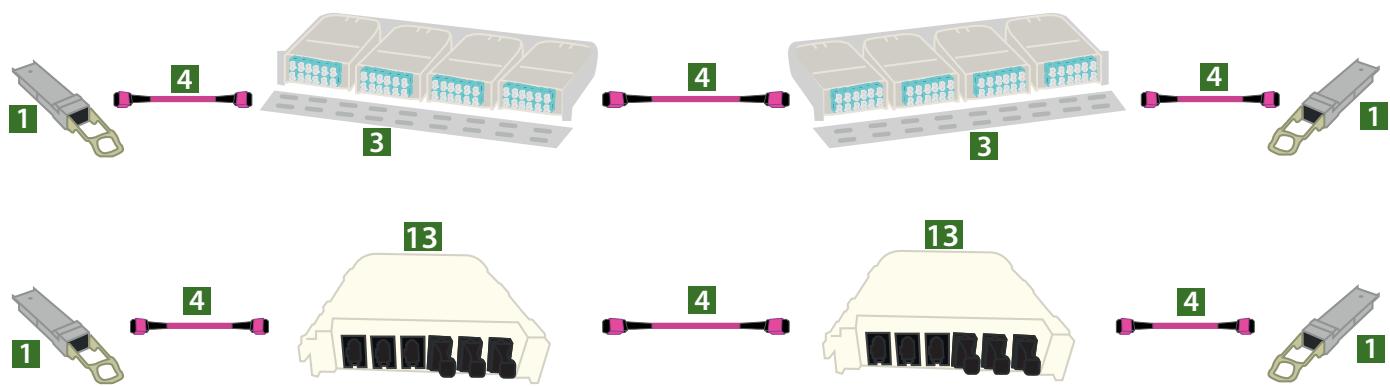

A „Direct Connect“ is used, for example, when a backup connection is to be established. In this case, it must be ensured that one type B coded MTP® cable is used per route.
